REGISTRAR'S NOTES ON NAMES IN THIS SUPPLEMENT

¹ *Cymbidium* Soulhunt. Also written Soul Hunt which is here treated as a synonym. Long-time unregistered hybrid, probably made in 1970s, commercially grown for cut flowers in India, where it is very popular. Udai Chandra Pradhan helpfully explained that his friend and relative Ganesh Mani Pradhan informally named it Soulhunt. Ganesh introduced it to India, and grew the plants from seeds sent to him by Keith Andrew of Dorset, UK. Recently this hybrid has become available in the UK through McBean's Orchids, who received a flask from an Indian visitor.

The following references illustrate how this previously unregistered name has been taken up in India, and demonstrate the commercial importance of this hybrid.

Corrections to previous Quarterly Supplement (March 2013):

x *Angraecoonopsis* [Agcp.] J.M.H.Shaw = *Angraecum* x *Phalaenopsis* was published as x *Angraecopsis* in error. This erroneous spelling is an illegitimate homonym of *Angraecopsis* Kraenzl. in Bot. Jahrb. Syst. 28(2): 171 (9 Mar 1900).

The abbreviation for x *Vanquetia* was erroneously published as *Vgt.* whereas it should be *Vqt.*

New combinations

Cattleya x *delicata* (Rolfe) J.M.H.Shaw. Basonym: x *Laeliocattleya delicata* Rolfe, Orchid Rev. 9: 61 (1901), thought to represent a natural hybrid of *C. forbesii* x *C. crispata*.

Nomenclatural notes

The name *Paphiopedilum wilhelminiae* was originally published with that spelling in the AOS *Bulletin* 10: 373 (1942). Since then IPNI and the RHS, as well as respected authorities such as Phillip Cribb in his monograph *The Genus Paphiopedilum*, have followed that spelling. However, the epithet is for Queen Wilhelmina of the Netherlands. According to ICBN Art. 60C(a), formation of a substantial epithet from this name is as follows: if ending in –a, add –e, which produces the epithet *wilhelminae*, not *wilhelminia*. Hence the correct spelling of the name is *Paphiopedilum wilhelminae*. The databases at AOS, IPNI, Kew and RHS now all follow the revised spelling.

Author citation for *Vanda*

According to the late L. Springate (pers. comm., 2008), four indigenous plant names had been taken from Sir William Jones' paper: Botanical observations on select Indian plants, *As. Res.* 4: 237–312, and listed as generic names in *Index Kewensis* (the forerunner of IPNI). The names are: *Syama* p. 261, *Saivala* p. 275, *Cuvera* p. 281 and *Vanda* p. 312. None were proposed as Linnaean names by Jones, and should not be treated as such. Of the four names, only *Vanda* is in current use and usually cited as *Vanda* Jones ex R.Br. Furthermore, in publishing *Vanda* as a genus, Robert Brown listed *Vandá* Jones as one of the synonyms of the type species. According to ICBN Art. 46.3 'an author citation appearing in a list of synonyms does not constitute a description', therefore the generic name should be cited as *Vanda* R.Br.

NEWS RELEASE

Orchid Hybrid Registration Advisory Group News Release May 2013

At a meeting of the Royal Horticultural Society's Orchid Hybrid Registration Advisory Group (OHRAG) in London on 22 May 2013, the proposed nomenclatural changes in the *Vandaeae* were discussed. The Group was privileged to receive seminar presentations by André Schuiteman and Lauren Gardiner, both from the Kew Herbarium, on their research into the taxonomy of the *Vandaeae*. A full account is due to be published in volume 6 of *Genera Orchidacearum* which is scheduled for publication in February 2014, and is the final volume of the series.

Following discussion, the members of OHRAG unanimously recommended adoption of the following changes in the Hybrid Register immediately.

Vanda is to be expanded to include: *Ascocentropsis*, *Ascocentrum*, *Christensonia*, *Eparmatostigma*, *Euanthe*, *Neofinetia* and *Trudelia*.

Aerides flabellata has been transferred to *Vanda*.

Papilionanthe is to be accepted as distinct from *Vanda*.

Arachnis to include: *Armodorium* and *Esmeralda*.

Gastrochilus to include: *Haraella*.

Holcoglossum to include: *Ascolabium* and *Penkimia*.

Phalaenopsis to include: *Doritis*, *Kingidium*, *Lesliea*, *Nothodoritis*, *Ornithochilus* and *Sedirea*.

Renanthera to include: *Ascoglossum*, *Porphyrodesme*, and *Renantherella*.

Robiquetia to include: *Abdominea*, *India*, *Malleola*, *Megalotus* and *Samarorchis*.

Trichoglottis to include: *Ceratochilus*, *Staurochilus* and *Ventricularia*.

In the past it has been the custom to await publication of the relevant volume of *Genera Orchidacearum* and wait for six months to allow discussion before implementing any nomenclatural changes. On this occasion, however, it seemed appropriate for implementation to proceed due to the uncontroversial nature of the changes, and in order to have all the changes in place before data are extracted from the Hybrid Register to prepare the forthcoming *Sander's List of Orchid Hybrids 3 Year Addendum*. It is hoped this will prevent unnecessary delay in publication of the *Addendum*. In addition, *Doritis* and *xDoritaenopsis* have already been moved into *Phalaenopsis*.

Some of the new names and combinations required have already been published in this and the previous issue of *The Orchid Review Quarterly Supplement*, and in *Phytotaxa* 71: 42–47 (13 Nov. 2012) and *Phytotaxa* 61: 47–54 (6 Aug. 2012).
