REGISTRAR'S NOTES ON NAMES IN THE REGISTER

New Group

Paphiopedilum Arete grex, GXAAAS Hope Group.

This Group derives from a reciprocal cross to the original Arete grex (*Paphiopedilum spicerianum* x *P. concolor*) that had been made by Veitch in 1892 (*Gardeners' Chronicle* 1892(2): 744). Made 19 Nov 2015, sown 10 Aug 2016; culture (deflasking) 6 Nov 2017; first flowered 8 Feb 2021. Registered by Ms Xiuling Li, China. Made by Vice Prof. Jizheng Fan and Prof. Zhaoyang Bu, at Guangxi Academy of Agricultural Sciences, China. Flower elegant and generous, dorsal sepal white with purple-brown mid-vein, intermediate in shape. Petals light yellowish green with reddish brown markings, more pronounced above midline. Lip elongated and slipper-shaped.

New cultivars

Three new cultivars are established for ***Papilionanda*** [Pda.] **Khoo Lay Kee** grex by Koh Keng Hoe, Singapore:

'**James**' Inflorescence with 8 blooms. Flowers 4.0 inches wide, with slight gaps between generally overlapping tepals, and a slight gap between lower sepals, uniformly dark pink across sepals and petals except for the lower ones which are a darker shade, tepals of light texture.

'**Merlene**' Inflorescence with 9 blooms. Flowers 3.5 inches wide, with no gaps between perfectly overlapping tepals.

Overall colour reddish pink, lip dark reddish pink, with small darker dots across sepals and petals. Texture heavy.

'**Serene**' Inflorescence with 8 blooms. Flowers 4.5 inches wide, with slight gaps between tepals, and a large gap between lower sepals, uniformly pink across sepals and petals, tepals of light texture.

All cultivars are quarter-terete hybrids, easy to grow in full sun, but hard to propagate as the seed pods produce only a small number of seeds.
