## REGISTRAR'S NOTES ON NAMES IN THIS SUPPLEMENT

<sup>1</sup> ***Laeliocattleya* Good Days and *Lc. Jairak Taffy* – confusion involving Florida SunCoast Orchids & Suwada Nursery**  
*Laeliocattleya* Jairak Taffy (*L. rubescens* x *C. walkeriana*), made and registered by Somboonpol, appears in the above list. Later on the same day it was registered, Jim Roberts of Florida SunCoast Orchids applied to register *L. rubescens* 'Alba' x *C. walkeriana* 'Alba', which he had made in 2016, and flowered in 2019.

However, the hybrid currently registered as *Lc.* Good Days (*Lc.* Happy Essence 'Heart's Desire' x *C. walkeriana* Semialba Group) 'Puanani', made and registered by Suwada Orchids, Japan, 28 January 2003, was originally registered in 2003 with *Laelia rubescens* as seed parent. This made it appear to be the same grex as both the hybrids made and distributed by Somboonpol and Jim Roberts.

Some time later, Mr Gouda of Kokusai Nursery recognised that the seed parent used at Suwada was actually *Lc.* Happy Essence, a hybrid made using *L. rubescens* by Stewart Orchids of California.

Consequently, many plants that have been distributed in Japan by Suwada as *L. rubescens* were really *Lc.* Happy Essence, and plants previously distributed by Jim Roberts as *Lc.* Good Days were actually *Lc.* Jairak Taffy.

<sup>2</sup> ***Phalaenopsis* HW-3 grex, HW-7 grex**

Because the registrant has also established cultivar epithets with the same format ('HW-5' etc.), the word grex has been added to these epithets with the registrant's agreement, to help avoid confusion.

<sup>3</sup> ***Phalaenopsis* Raymond Burr**

This grex with the parentage (*Phal.* Salu Peoker x *Phal.* Ho's French Fantasia) was named and originated by Norman Fang, and checked in on 8 Oct 2021. This cross already exists in the Register (in the opposite direction) as *Phalaenopsis* Frog Hollow Fantasia, registered in June 2006. However, it transpires that the name *Phalaenopsis* Raymond Burr has been in use since 2004, and may or may not have been established in a printed list or catalogue around that time. It was mericloned and appeared in *Orchids* (AOS) 75(11): 795 (2006), but without a statement of parentage. Consequently, this entry has been checked to account for a name that appears in print and is widely used, though at present there is some uncertainty if it is established under ICNCP.

¶ **Species new to registration**

***Bulbophyllum ericssonii*** Kraenzl., *Gard. Chron.*, ser. 3, 14: 522 (1893). Syn: *Bulbophyllum binnendijkii* J.J.Sm., *Orch. Java*: 442 (1905).

***Calanthe limprichtii*** Schltr., *Repert. Spec. Nov. Regni Veg. Beih.* 12: 349 (1922).

***Encyclia oliverrana*** Campacci, *Bol. CAOB* 66-67: 60 (2007).

***Habenaria chlorina*** C.S.P.Parish & Rchb.f., *Trans. Linn. Soc. London* 30: 140 (1874).

***Maxillaria cryptobulbon*** Carnevali & J.T.Atwood, *Novon* 1: 159 (1991).

***Maxillaria grayi*** Dodson, *Orquideologia* 19: 69 (1994).

***Mormodes lobulata*** Schltr., *Repert. Spec. Nov. Regni Veg.* 8: 456 (1910).

***Porroglossum marcojimeneziorum*** Baquero & Fierro-Minda, *Lankesteriana* 20(2): 130 (2020).

***Porroglossum schramii*** Luer, *Phytologia* 46: 379 (1980).

***Thrixspermum centipeda*** Lour., *Fl. Cochinch.*: 520 (1790).

## REGISTRAR'S NOTES ON NAMES IN THE REGISTER

## New cultivars

***Phalaenopsis* HW-3 grex** (*Phalaenopsis* HW-7 grex x *Phalaenopsis* Sogo Yukidian) bred and registered by Hua Wang Biotech Ltd, Taiwan. Inflorescence with 12–16 blooms, flowers 12–13cm wide, with hot pink sepals and petals and a small white area in the centre of the flower. The following two cultivars belong to this grex.

'HW-5' Distinguished by: **1** The veins on sepals and petals are darker so they are more distinct. **2** The white zone towards the base of the petals at the centre of the flower is clearly defined and does not extend into the petals. **3** The shape of sepals is broader so they hardly extend upwards beyond the petals.

'HW-16' Distinguished by: **1** The veins on sepals and petals are not very clear. **2** The white zone towards the base of the petals at the centre of the flower is diffuse and spreads into the petals. **3** The shape of sepals is narrower so they extend further upwards beyond the petals.

### ***Dendrobium Gracillimum* as an established grex name**

Prior to 1 January 2010, when a rule of the 9th edition of the ICNCP came into force, it was possible to create a grex epithet by replicating the specific epithet of a nothospecies. Since that date a different epithet must be used to distinguish a nothospecies (ie a natural hybrid with a botanical name) from a grex that has the same putative parent. The two were distinguished typographically, the nothospecies by italic script and lower case initial letter, as in *Cattleya x adrienne*, and the grex by non-italic script and a capital initial letter, as in *Cattleya Adrienne*.

Consequently, the only way to accept *Dendrobium x gracillimum* as the basis for the grex name *Dendrobium Gracillimum* would be to find a publication of this grex providing nomenclatural establishment dated prior to 1 January 2010. Ian Chalmers helpfully provided a photograph of just such a publication. It appears in Tom Gregory's Merrellen Orchids catalogue for 1996–1997 [unpaginated] as “85/93 *D. Gracillimum* (*D. gracilicaule* (246/87 seedling) x *D. speciosum* var. *speciosum* ‘Tamborine’). A manmade *gracilicaule* and a manmade *speciosum* used here: ‘Tamborine’ is a seedling of the selfing of ‘Dorothy’, should give *gracillimum* that are both compact and early.”

### **New combination**

***Rossioglossum malpighioides*** (Archila, Szlach. & Chiron) J.M.H.Shaw comb. nov. Basionym: *Chelyorichis malpighioides* Archila, Szlach. & Chiron, *Richardiana* 16: 221 (2016). Although the epithet was spelled correctly in the protologue, it currently appears in many places as *malpighioides*. However, it is understood to mean ‘resembling a *Malpighia*’, a genus named after Marcello Malpighi, a 17th-century Italian physician and botanist. Because it is derived from a personal name, this spelling *malpighioides* is upheld.

### **Miscellaneous notes on nothogeneric names**

There are several nothogeneric names that are in use in an assortment of publications and webpages which would benefit from some explanation and/or require validation. I am very grateful to Zhenhao Feng, China, who is working on a database of orchid nothogenera for bringing the following to my attention.

**x *Enchelia*** [Ehl.] Z-H.Feng & J.M.H.Shaw = *Encyclia* Hook. x *Laelia* Lindl. x *Prosthechea* Knowles & Westc.

**x *Hansenara*** [Hns.] Z-H.Feng & J. M. H. Shaw = *Cattleya* Lindl. x *Encyclia* Hook. x *Laelia* Lindl. x *Sophronitis* Lindl., named after George Hansen (1863–1908), author of *The Orchid Hybrids* (1895). x *Hansenara* and its abbreviation *Hns.* both appear in a number of hard copy and electronic publications on orchids, and may have been inadvertently validated. [x *Hansenara* was also used initially for *Agave x Manfreda x Polianthes*, but apparently not validly published and, due to the potential homonymy, has since been renamed x *Hansara*, for the American breeder Hans Hansen. More recently, *Manfreda* and *Polianthes* have been treated as part of *Agave*.]

**x *Meadara*** [Mea.] Z-H.Feng & J.M.H.Shaw = *Brassavola* R.Br. x *Cattleya* Lindl. x *Encyclia* Hook. x *Laelia* Lindl. x *Sophronitis* Lindl., named after Theodore L. Mead, author of *A hybridist's notes* (1896).

**x *Pourbaixara*** [Pou.] Z-H.Feng & J.M.H.Shaw = *Cattleya* Lindl. x *Cattleyopsis* Lem. x *Caularthron* Raf. x *Epidendrum* L. x *Laelia* Lindl. x *Prosthechea* Knowles & Westc. x *Rhynchoaelia* Schltr. x *Sophronitis* Lindl., named after Eugène Pourbaix of Belgium, fl. 1898–1903.

**x *Psychelia*** [Pye.] J.M.H.Shaw = *Psychilis* Raf. x *Rhynchoaelia* Schltr. Due to a typographical error this name was erroneously published as *Psychilea* in *Orch. Rev. Suppl.* 115(1277): 26 (5 Sept 2007) which orthography is contrary to ICN Art. H.6.2. It has since been republished with corrected orthography several times, such as in *SLOH Addendum* 2014–2016: lxxvii (2017).

**x *Schombarthron*** [Sbr.] Z-H.Feng & J.M.H.Shaw = *Caularthron* Raf. x *Schomburgkia* Lindl.

**x *Schomleycycilia*** [Smy.] Z-H.Feng & J.M.H.Shaw = *Cattleya* Lindl. x *Encyclia* Hook. x *Schomburgkia* Lindl.

**x *Sophrœlaeliocycilia*** [Sly.] Z-H.Feng & J.M.H.Shaw = *Encyclia* Hook. x *Laelia* Lindl. x *Sophronitis* Lindl.

**x *Spathocalanthe*** Linden ex Z-H.Feng & J.M.H.Shaw = *Calanthe* R. Br. x *Spathoglottis* Blume. This name first appeared in *Semaine Horticole* 2: 265. 1898 [18 Jun 1898], but as a provisional name for a hybrid created by Linden. Provisional names are not validly published under the ICN Art. 36.1, hence the need for a new publication here.

The following nothogenera also have illegitimate later homonyms, authored by Garay (in *Bot. Mus. Leaflet* 23(4): 188. 1972) who erroneously sought to equate *Neofinetia* with *Holcoglossum*, and subsequently published amended hybrid formulae for the same nothogeneric names. Since a nothogenus is defined by its nomenclatural formula any change to the names in the formula creates a new nothogenus. His action created a series of illegitimate homonyms that cannot be used, as follows.

**x *Hueylihara*** (Hylra.) H.S. Chen & Wreford (1971) = *Neofinetia x Renanthera x Rhynchostylis*, valid name. x *Hueylihara* Garay (1972) = *Holcoglossum x Renanthera x Rhynchostylis*, later illegitimate homonym.

**x *Nakamotoara*** (Nak.) K. Nakamoto & Wreford (1964) = *Ascocentrum x Neofinetia x Vanda*, valid name. x *Nakamotoara* Garay (1972) = *Ascocentrum x Holcoglossum x Vanda*, later illegitimate homonym.

**x *Rumrillara*** (Rlla.) Rumrill & Wreford (1969) = *Ascocentrum x Neofinetia x Rhynchostylis*, valid name. x *Rumrillara* Garay (1972) = *Ascocentrum x Holcoglossum x Rhynchostylis*, later illegitimate homonym.

**x *Smithara*** (Sm.) Garay & H. R. Sweet (1966) = *Ascocentrum x Euanthe x Neofinetia x Vanda*, valid name. x *Smithara* Garay (1972) = *Ascocentrum x Euanthe x Holcoglossum*, later illegitimate homonym. x *Smithara* D.M.Cumming, *Haworthiad* 13(1): 20 (1999) = *Gasteria x Haworthia x Poellnitzia*, later illegitimate homonym.
