REGISTRARS' NOTES ON NAMES IN THE REGISTER

Correction to parentage of *Cymbidium* × *rosefieldense* and *Cym. Rosefieldense* grex

The original statement of parentage appears in *Gard. Chron.* 44: 453 (1908) as "Rosefieldiense, (*Cym. tracyanum* × *Cym. grandiflorum*), a very promising hybrid, with large flowers, in which both parents can easily be traced. When grown it should be very handsome." See also *Kew Bull.* 1909(App. 3): 87.

Correction of parentage of *Paphiopedilum* Mountain View Plum = *Paph. California Lights* × *Paph. Taisuco America's Plum*, J.Fang

The pollen parent was originally registered as *Paph.* Erma Shulda in error.

Dendrobium brownii earlier than *Dendrobium discolor*

According to Ormerod, P. *The Orchadian* 20(8): 361–365 (2022), *Dendrobium brownii* F.Dietr., *Nachtr. Vollst. Lex. Gartn.* 10: 122 (1824) is an earlier name for *Den. discolor* (1841). No adjustment has been made in the register as yet since a proposal to conserve the later name may be forthcoming.

Ida reinstated over *Sudamerlycaste*

Following an extended investigation reported in the accompanying issue of *The Orchid Review* it has been concluded that publication of the genus *Ida* was prior to *Sudamerlycaste* by several years. Consequently, *Ida* has been reinstated in the register. It is also reinstated in *Plants of the World Online* (POWO).

Replacement name

Vanda* × *loii Motes, *Nat. Gen. Vanda* 311 (2021), nom. illeg. later homonym. Contrary to Art.53.2 ICN (2018) since likely to be confused with *Vanda lowii*. The specific epithet honours Dr Raymond Lo of Manila. A replacement name is here provided, ***Vanda* × *raymondii*** J.M.H.Shaw nom. nov. Replaced synonym: *Vanda* × *loii* Motes, *Nat. Gen. Vanda* 311 (2021).

New Group

***Vanda* Greg Scott grex, Motes Dark Fire Group**

Parentage: *V. tessellata* 'Mary Motes' FCC/AOS (nearly black flowers) × *V. merrillii* var *rotori* 'Mary Motes' JC/AOS (flowers concolor deep red overall). Bred by Martin Motes, USA.

This Group is distinguished by flowers with tepals uniformly deep burgundy red. Although a few of seedlings produce mottled yellow/red flowers such as would be expected from a cross of typical colour variants of the parental species, the vast majority are the deep burgundy red type that comprise this new Group.

New hybrid genus

×***Holcoglottis*** [Hgl.] P.Rahthat nothogenus nov. = *Holcoglossum* Schltr. × *Trichoglottis* Blume.

×***Erasaecum*** [Ers.] J.M.H.Shaw nothogen. nov. = *Angraecum* Bory × *Erasanthe* P.J.Cribb, Hermans & D.L.Roberts.
