Note on *Calanthe yuana* / *yueana*

Calanthe yueana Tang & F.T.Wang was originally published in *Bull. Fan Mem. Inst. Biol. Bot.* 7: 7 (1936) as "*Calanthe yūana*", and consequently it is listed as *Calanthe yuana* in many reference works including Clayton & Cribb, *The Genus Calanthe* (2013: 152) and *Flora of China* 25: 303 (2009). However, according to ICN Art. 60.7 (2018), diacritical signs are not used in scientific names and thus the signs are to be suppressed and replaced with the necessary transcription of letters so modified. Consequently, *ū* becomes *ue* and therefore the epithet *yūana* becomes *yueana*.

Although *Calanthe yueana* does not yet appear in the full register of orchid hybrids there are now several hybrids available in cultivation with this species as a parent. They are listed under *Calanthe* in *RHS Plant Finder 2019*, and also appear in the RHS Horticultural Database.

Note on *Miltoniopsis* Golden Snows grex 'White Lightning' / WHITE LIGHT

The cultivar 'White Lightning' was originally bred and selected at Okika nurseries, Hawaii. It was subsequently mericloned at a laboratory in Thailand in December 2010, and again in June 2013. Plants were released under a trade designation as WHITE LIGHT, under which label they have been distributed and even awarded. Awards made to this plant which may also have been given other cultivar names for judging, or labelled 'White Light' as though these words were a cultivar epithet, should be labelled 'White Lightning'.

Trade designations are words used for marketing purposes that have no nomenclatural significance, hence they should never be styled as though a cultivar epithet in single inverted commas. The ICNCP recommends that they be presented in a different typeface to valid names, hence the use of small capitals for trade designations in RHS publications.

Trade designations cause considerable confusion at times, particularly for awards judging, as they can be easily mistaken for valid names. At times they may even supplant the valid name in general use. However, they are simply words designed to appeal to a buyer, and do not constitute a name. Careful research is required when dealing with commercial plant labels.

Sander's List of Orchid Hybrids Three Year Addendum 2014–2016

The latest three-year (13th) addendum to Sander's list of orchid hybrids was published by the Royal Horticultural Society in July 2017.

It contains names, parentage, and names of registrant and originator for all orchid hybrids registered between 1 January 2014 and 31 December 2016 – about 9,000 hybrids.

It also includes a master list of all accepted hybrid genera currently in use. The list includes their standard abbreviations and component genera. This has been made possible because all the name changes from *Genera Orchidacearum* volumes 1 to 6 have been incorporated.
