

The International Daffodil Register & Classified List (2008)

Twelfth Supplement

TWELFTH SUPPLEMENT
to the
INTERNATIONAL DAFFODIL REGISTER AND CLASSIFIED LIST (2008)
2018–2019

The daffodil names listed here are supplementary to the *International Daffodil Register* (2008). They were registered between **1 July 2018 and 30 June 2019**. They are followed by a list of some other recent additions and amendments to the Register.

REGISTRATION

Hybridizers, raisers and other introducers of daffodils are urged to ensure that the names of new plants are registered and are reminded that registration should preferably take place **before** plants are released or catalogued. Registration is conducted by The Royal Horticultural Society, International Cultivar Registration Authority for the genus *Narcissus*. Application forms are available from:

- The International Daffodil Registrar: Melanie Underwood
RHS Wisley, Woking, Surrey GU23 6QB, UK
Fax (44) 01483 211750
Email melanieunderwood@rhs.org.uk
- The National Daffodil Registrar (the Netherlands): Drs J. van Scheepen
KAVB, Postbus 175, 2180 AD Hillegom, the Netherlands
Fax (31) 2525 369 51
Email vanscheepen@kavb.NL
- The National Daffodil Registrar (USA): Mrs Mary Lou Gripshover

Once registered, names and classifications may be changed only with the agreement of the International Cultivar Registration Authority, upon application to the International Registrar.

NOTES ON CLASSIFICATION AND DESCRIPTION

Note 1 – on classification

The combination of division and colour code assigned here (or as amended in any future Supplement) is the registered classification, to be observed, for example, when schedules require cultivars to be shown “as registered”. The registered classification is not altered by any note of variable measurement or colour. (See page 18 for any notes of variability in previous registrations).

Note 2 – on colour coding

Guidelines on colour coding, including those on distinguishing between Yellow and Orange and between Orange and Red, appear in the Register and on registration forms. It is at the registrant’s discretion to distinguish White from Yellow or Green, Yellow from Green, or Pink from the paler tones of Orange or Red.

In addition:

– Green at corona base

The green at the base of a corona, whether in the tube or in the corona itself, may be included in the colour code if it is prominent and plain to see. Registrants are advised to include it only if it is consistent from year to year.

– Non-concentric colours

When coding colours in perianth or corona that appear in radial rather than concentric bands, or in a flare from the base, or in flecks or splashes: start with a letter for the predominant colour; proceed with an oblique line; follow with the letter(s) (in any order) for the non-predominant colour(s).

For example, a yellow flower with a white streak along the midrib of the perianth segments would be Y/W-Y; a white flower with radial bands of orange and yellow on the corona segments would be W-W/OY.

Note 3 – on colour terms

Colour Chart numbers in registered descriptions, e.g. ‘Anfield’ brilliant yellow 7A, are from the *RHS Colour Chart* (1966, 1986, 1995, 2001, 2007, 2015). Colour names followed by Chart numbers without brackets are equivalents adopted by the RHS for all its international registers. They are taken from the Universal Colour Language in the Inter-Society Color Council-National Bureau of Standards colour-name system. Colour names followed by Chart numbers with brackets or by no numbers at all are those supplied by the registrant.

Note 4 – on description

Registered descriptions are drawn up from application forms and, whenever possible, from photographs and specimens. The Registrar would welcome readers’ comments on the accuracy of all descriptions.

Illustrations of descriptive terms appear on page 20.

Note 5 – on height

Stem heights in registered descriptions may be taken to be Standard (325–675mm) unless otherwise stated, when they will be described as Dwarf (less than 325mm) or Tall (more than 675mm).

Note 6 – on Nomenclatural Standards

The Standard noted at the end of some descriptions is the designated herbarium specimen or illustration forming a permanent record of the distinguishing characteristics of the cultivar and fixing the cultivar name. These are maintained at the RHS Herbarium, Wisley.

Note 7 – on unregistered names

Names listed as ‘unregistered’ are those post-1955 that have not been accepted by the RHS or have not yet been submitted for registration. They are included as part of the Check List and they gain no registered status by being listed. They are included in order to prevent confusion between daffodils of the same name and to help prevent further duplication.

REGISTRATIONS 2018–2019

The following 133 cultivar names were registered between **1 July 2018 and 30 June 2019** by The Royal Horticultural Society, International Cultivar Registration Authority for the genus *Narcissus*.

To access the *International Daffodil Register and Classified List* (2008) and to download the PDF document *Supplements 1-12 Cumulative List of Registrations (Abridged)* visit:

www.rhs.org.uk/plants/plantsmanship/plant-registration/Daffodil-cultivar-registration

Entries follow the style of those in the *International Daffodil Register and Classified List* (2008) and may be interpreted accordingly (see p10 in the Register).

The seed parent is given before the pollen parent.

‘Anfield’ 7 Y-O

(Walter J.M.Blom) VOF J.S.Pennings De Bilt, 2019
N. jonquilla var. *henriquesii* × ‘Patabundy’;

ADDITIONS AND AMENDMENTS TO THE INTERNATIONAL DAFFODIL REGISTER (2008) AND SUPPLEMENTS

The compilers are grateful to those who have drawn attention to omissions from the International Daffodil Register and its Supplements, pointed out errors, suggested changes or supplied new information.

Amendments to cultivar names, divisions, colour codes, parentages, originators and registrants will usually be published in an annual Supplement. Amendments to descriptions will usually only be published in a new edition of the Register. However, all amendments will be published on the internet, in a regular updating of the Register posted at: www.rhs.org.uk/plants/plantsmanship/plant-registration/Daffodil-cultivar-registration

Narcissus romieuxii 'Julia Jane'

Outlined below is a decision on *Narcissus romieuxii* 'Julia Jane' that was taken by the RHS *Narcissus* Classification Advisory Group in June 2019. It impacts on daffodils that are marketed under the name 'Julia Jane' but do not have a petunioid corona with rolled rim.

'Julia Jane' is now registered – see page 10. This is the selection from *Narcissus romieuxii* from Morocco that Jim Archibald first put on the market in 1974, a pale yellow flower with a very widely expanded (petunioid) corona whose rim is more or less rolled back. Stock registered is that held by Bob and Rannveig Wallis that has been vegetatively propagated from a clone Jim Archibald gave them of the original selection. Non-petunioid stocks going under the name of 'Julia Jane' seem to have been derived either from seed from the original clones or from material from the 'Julia Jane' site that Jim Archibald did not select for naming but issued instead as a mixed bag under collection no. JCA805. The name 'Julia Jane' should, therefore, be withdrawn from non-petunioid stocks and confined to wide-spreading, roll-rimmed clones resembling that which Jim Archibald handed to the Wallises.
